

## UNIVERSITE DE TECHNOLOGIE DE COMPIEGNE

Compiègne, 2014, the 28<sup>th</sup> of November

Dear colleague,

Jonathan COIGNARD, enrolled in Urban Systems Engineering, wishes to study the next six-month period in your university laboratory.

Jonathan COIGNARD is a highly motivated student, autonomous worker, and with undeniable human qualities. He showed great interest in analysis, modeling and simulation of electrical systems, and the project which he wishes to study in your university laboratory is in good adequacy with his professional project and will allow him to conclude it. During the last ten months, the student has done considerable research work on the development, simulation and experimental implementation of a wind turbine emulator.

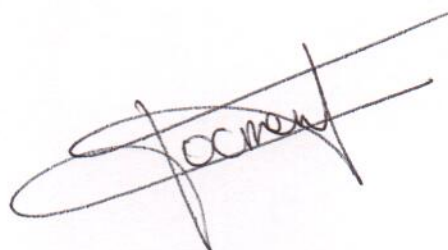

As supervisors, we testify that Jonathan COIGNARD showed great interest for research in the field of electric engineering, especially renewable energies.

Jonathan COIGNARD, in view of his academic results and the quality of the wind turbine emulator project, has the necessary capacity to succeed a research study in your university laboratory.
